ANYSECU-4G-W2 LTE- 4G-3G Includes VOCALIS-PRO PoC

PLUG-N-PLAY GPS. ENGINE CODES AND DRIVE SAFE REPORTS

**VOCALIS-PRO**  
*It has no equal!*

Datalink Systems has been supporting the LMR community with advanced AVL and data processing applications for over fifteen years. We continue that high level of support with our PoC based VOCALIS-PRO. All others including the major LMR manufacturers offer select models of dedicated radio on dedicated Cellular networks. Typically AT&T or T-Mobile.

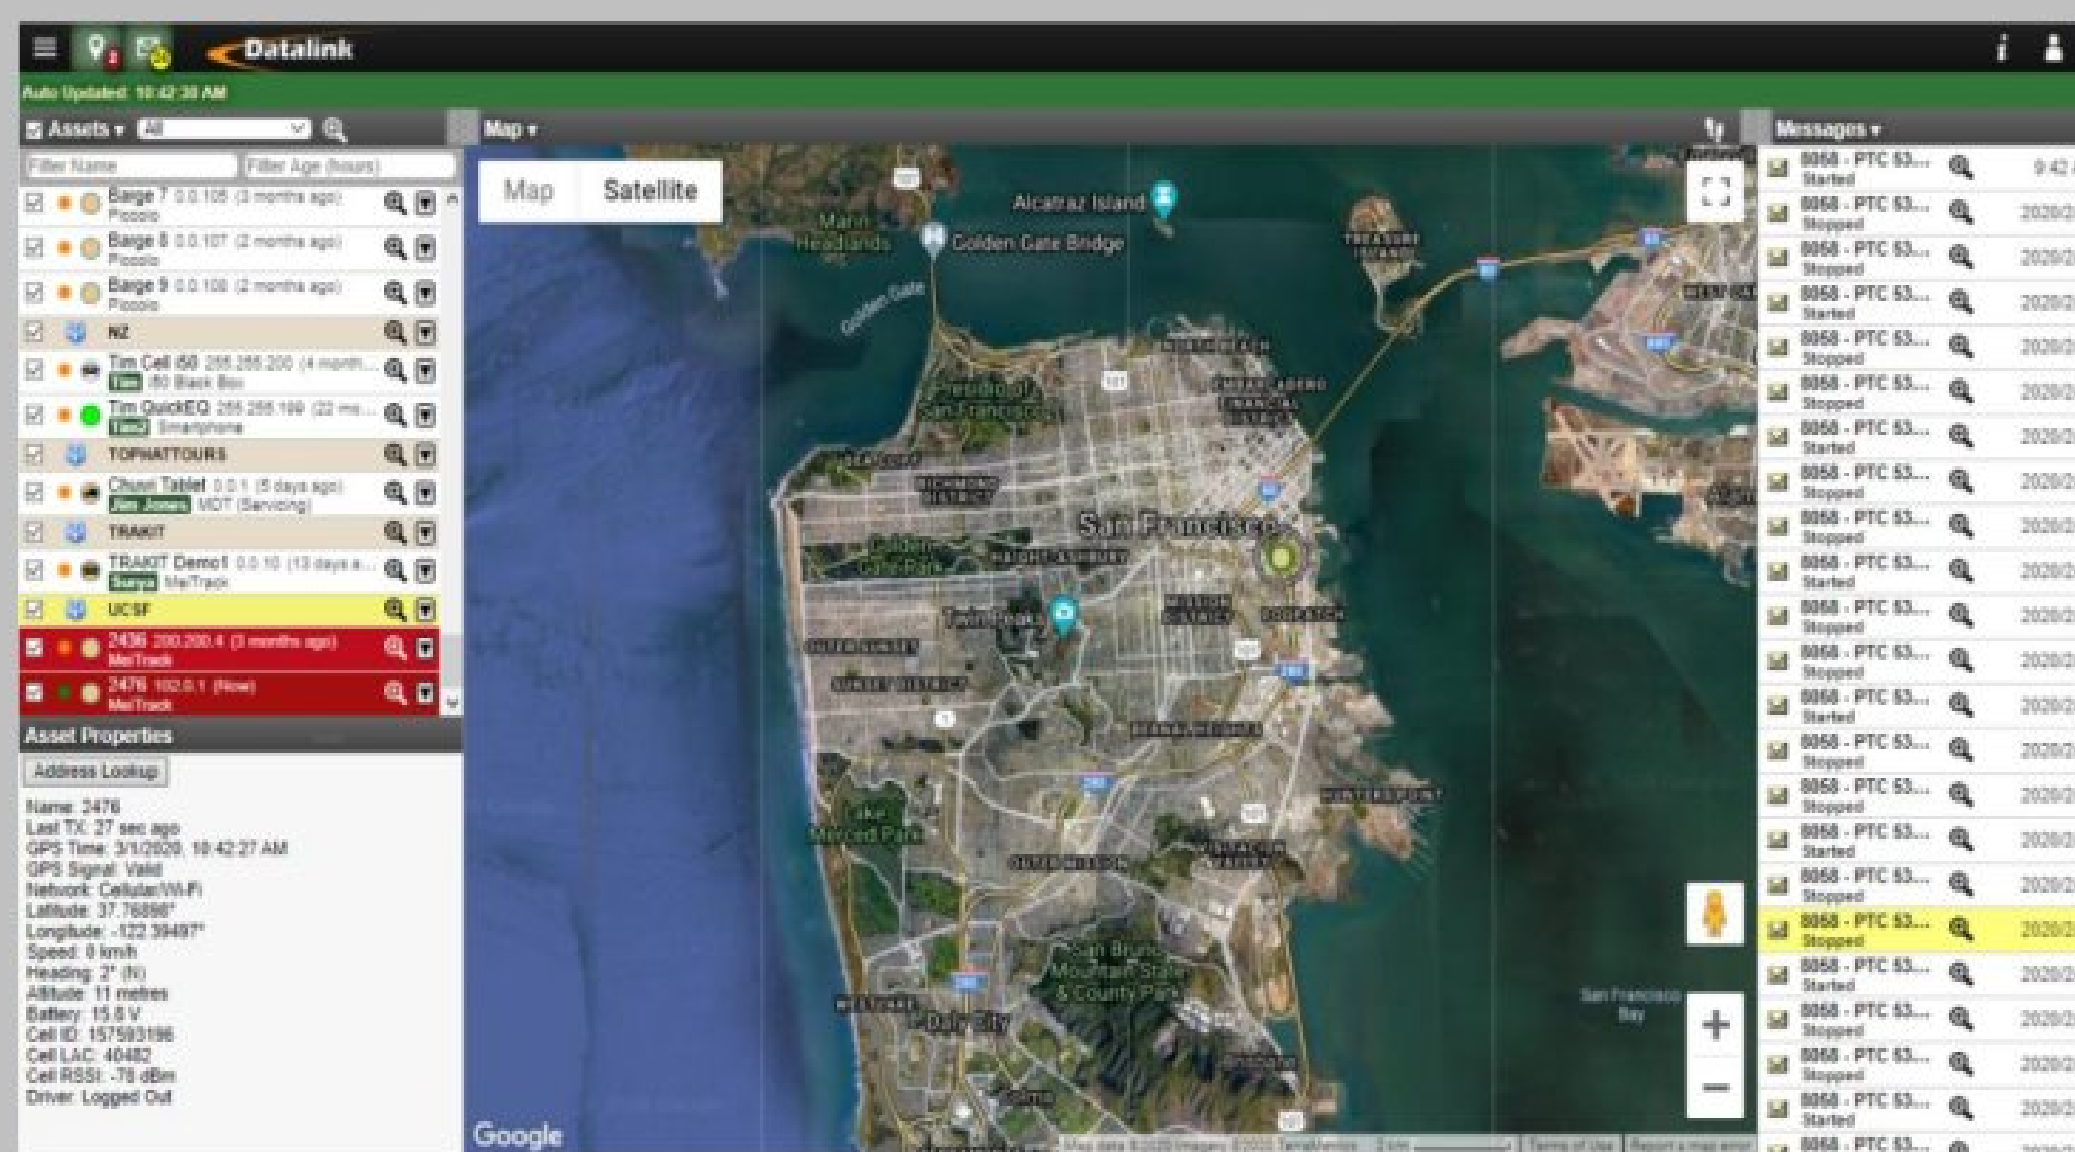

VOCALIS-PRO is Cellular network agnostic. Some regions have strong AT&T and weak T-Mobile. With VOCALIS-PRO it is not an issue. NextM2M Global SIMS and VOCALIS automatically switches to the strongest network.

VOCALIS-PRO also works with any unlocked Cellphone or PoC radio, Mobile or Portable Android preferred. Unlike those provided by Motorola, Kenwood, ICOM or Hytera (Cellular only now).

- VOCALIS-PRO is integrated with DataGate and WebGate. your LMR AVL and text messages are linked to VOCALIS-PRO
- VOCALIS is a complete PoC solution with an all-inclusive cost. Unlike ESCHAT and ZELLO with extra options.
- VOCALIS provides Security patrols with NFC touch verification of patrol door and asset checking.

VOCALIS-PRO is CLOUD based with global service. A recurring revenue stream for our resellers. Resellers can administer their "end user" accounts or allow the "end user" to administer their own accounts to the limits of their licenses.

**INCLUDES WEBGATE**

**5G coverage also includes 4G**

T-Mobile and AT&T are competing with each other each claiming the best coverage. NOTE! 5G towers also support 4G and the added coverage is a bonus for Datalink VOCALIS and M2M services. Much greater market potential!

VOCALIS PoC provides rural Police and Sheriffs Departments with alternative networks and group channels with unlimited distance. The VOCALIS App can be installed in any phone. E911 Dispatch compatible.

Long distance luxury tour buses typically use standard cell phones to communicate with their base. Illegal to use when bus is moving.

VOCALIS PoC provides two-way voice communications at all times with the touch of a button.

ULEPHONE Apps include Voice PoC (PTT) + DVIR + GARMIN Elog ELD HOS with automatic switching between Cellular Networks

The MDT-9100 is a rugged Multi-Input. Multi-Network terminal with optional VOCALIS screen with multiple Apps. including HOS and DVIR and Task Dispatching.
