SCHOOL BUS TRACKING

Datalink has developed an affordable school bus tracking system, that integrates NEXEDGE. Many States including California are mandating GPS tracking & inspection of school buses for students. We have the solution.

- GPS tracking messages and door sensors using NEXEDGE only.
- GPS tracking with OBD engine monitoring using Datalink's i50. Unlimited number of buses using WiFi store & dump or cellular.

AVAILABLE FEATURES

- **Immediate email reports when drivers are speeding and driving aggressively.**

- **Ability to remotely SHUT DOWN engine.**

- **Panic Button with immediate multiple email alerts.**

- **Monitors and stores all important safely functions.**

- **Monitors "idling engine" fuel wastage which can be hundreds of dollars each month.**

- **Confirms Drivers inspected the bus for sleeping students before locking the Bus. (Add-on option)**

- **Available with Encryption to protect students' personal information over Card Swipe or RFID links. (Add-on option)**
